

# Teenage Fanclub, Take The Long Way Round

Sunshine every beat when I'm around you  
Feels like maybe I've been here before  
Through the cold days of learning  
To the soul days of yearning

Take the long way around  
Take the long way around  
You know when you need it  
Heart begins to clear  
Tell me when you've seen it

She goes any way the lights are going  
She knows there's no meaning to defend  
Pull the subway to the station  
For that golden lights sensation

Take the long way around  
Take the long way around  
You know when you need it  
Heart begins to clear  
Tell me when you've seen it

Sometimes you underline destinations  
Sometimes you try to find inspiration

Take the long way around  
Take the long way around  
Take the long way around
