## The 69 Eyes, Still Waters Run Deep

Every time I hear you breathe In the still night next to me And your innocent heart to beat I feel so complete

Just let me listen to you gently breathe No words do we need Let your innocent heart to speak Still waters run deep

What you say
What you do
You do it all for me and you
What I do
And what I say
I do it all to be this way

Every time I hear you breathe In the still night next to me And your innocent heart to beat I feel so complete

Just move a little bit closer to me No words do we need Let your innocent heart speak Still waters run deep

Chorus
