

# The Ataris, Takeoffs And Landings

On this coldest of January nights,  
we'll drive out past the runway,  
And watch the planes go flying by  
The runway lights are the deepest blue  
Like the colors of your eyes,  
So close them tight and kiss me one last time

If you could go anywhere right now, where would you go,  
And would you miss me when you get there  
There's no place that I would rather be

Please don't let me, go falling from the sky,  
This fasten seatbelt sign just needs to go out  
If only you could be, right here by my side,  
Home wouldn't seem so far from here

Passport, customs, carry-on, remember  
To shut off all of your, electronic devices  
fell asleep on Tuesday, woke up Monday afternoon  
I slept right through your international dateline

If you could go anywhere right now,  
Where would you go,  
And would you miss me when you get there  
There's no place that I would rather be

Please don't let me, go falling from the sky,  
This fasten seat belt sign just needs to go out  
If only you could be, right here by my side,  
Home wouldn't seem so far from here

Please don't let me, go falling from the sky,  
This fasten seat belt sign just needs to go out  
If only you could be, right here by my side,  
Home wouldn't seem so far from here

Please don't let me, go falling from the sky,  
This fasten seat belt sign just needs to go out  
If only you could be, right here by my side,  
Home wouldn't seem so far from here
