

The Frames, Star Star

Star star teach me how to shine shine
Teach me so I know what's going on in your mind
'Cause I don't understand these people
Who say the hill's to steep
Well they talk and talk forever
But they just never climb

Falling down into situations
Bringing out the best in you
You're flat on your back again
And star you're ever word I'm heeding
Can you help me to see
I'm lost in the marsh

Star star teach me how to shine shine
Teach me so I know whats going on in your mind
'Cause I don't understand these people
Who say we're all asleep
They'll toss and turn forever
But no rest will they find...
