The Presets, I Go Hard, I Go Home

Take me to the city lights
Can go but not when I'm at home
I need to go where I can see
Can hear things in stereo

Your life that's fraught with shame Mirrors and disco balls I never what now makes sense Think I understand it now

I go hard I go home

Forget about the things you want Forget about hopes and dreams Focus on the here and now Just think who we could have been

Boys from the magic show There's girls from the magazine Pick your opportunities And be who you wanna be

I go hard I go home

Cause sometimes you've got to go Where nobody know your name Leave all the things you know And learn how to start again

I go hard I go home
