The Verve, All In The Mind

So I've got the car We drove for a mile I didn't even learn her name She said: You've got the money and I've got the time

Five years later on She became my lover Taught me everything I know She said: You were born to fly my son I said: Hey! I already know

Because it's all inside Because it's all inside I was born to fly, fly pretty high

Five years later on She became my father Taught me everything I know She said:You were born to burn my love I said: Hey! I already know

Chorus x2

So waste your time On people who don't know which way to go there Never said you were, never said You were up in the sky Because it's all in the mind

Just get in the car Turn out the lights Don't care who you are You could be a star Or you could be a fool Don't care about it It's All In The Mind
