

# The Vogues, Magic Town

They told me the streets were all paved with gold  
But these dirty sidewalks are gray and concrete cold  
They said neon lights were a beautiful sight  
But how 'bout the one blinkin' in my room all night

And where's the magic in this magic town  
Where's the good life they said could be found  
Where's the magic to make all my big dreams come true

I gotta find it girl before I send for you

They said in this town you get rich in no time  
But here I am and I'm down to my last dime  
I just don't know why I bother to try  
When nobody here gives a hang if I live or die

And where's the magic in this magic town  
Where's the good life they said could be found  
Where's the magic to make all my big dreams come true

I gotta find it, girl before I send for you

And where's the magic in this magic town  
Where's the good life they said could be found  
Where's the magic to make all my big dreams come true

I'm gonna find it, girl, if it can be found

Before I bring you to

This magic town

This magic town (repeat to fade)
