

The Zutons, Creeping On The Dancefloor

She won't give me nothing
Not even one wet kiss
I asked her for her number
A detail I don't wanna miss
She won't entertain me
She just can't pretend
She just walks away
She won't even be my friend

Do you wanna stay out all night
Are we gonna hang till its light
If you wanna get out your mind
There's a chemistry when combined
Do you wanna stay out all night
Are we gonna hang till its light
If you wanna get out your mind
There's a chemistry when combined

You got me creepin' on the dancefloor, darling
You got me creepin' on the dancefloor, yeah

Gina likes to party
Puts on her favourite pants
But I won't get to hold her
How could I stand a chance
She tiptoes through the people
Without a care in the world
I should be swinging but I'm shakin'
I'm just tryna find the nerve

Do you wanna stay out all night
Are we gonna hang till its light
If you wanna get out your mind
There's a chemistry when combined
Do you wanna stay out all night
Are we gonna hang till its light
If you wanna get out your mind
There's a chemistry when combined

You got me creepin' on the dancefloor, darling
You got me creepin' on the dancefloor, yeah
You got me creepin' on the dancefloor, darling
You got me creepin' on the dancefloor, yeah

Do you wanna stay
Are we gonna hang
If you wanna get
There's a chemistry
Do you wanna stay out all night
Are we gonna hang till its light
If you wanna get out your mind
There's a chemistry when combined
Do you wanna stay out all night
Are we gonna hang till its light
If you wanna get out your mind
There's a chemistry when combined
Do you wanna stay out all night
Are we gonna hang till its light
If you wanna get out your mind
There's a chemistry when combined

You got me creepin' on the dancefloor, darling
You got me creepin' on the dancefloor, yeah
You got me creepin' on the dancefloor, darling

You got me creepin' on the dancefloor, yeah
