## Thin Lizzy, Borderline

Midnight in the big city
At the bar drinking all on my own
Just thinking about that girl and me
How something's going wrong

Mister, tell me, what's my saving grace? The back room boys Were all telling me I'm a borderline case

Back on the borderline one more time

Seven beers and still sober It's time to change to something stronger I cannot take this scene no longer She could have told me it's all over

Back in my home town The old place is still the same But time can cast a spell over something You can't go back again

Back on the borderline one more time

Mister, fill me another
Till I go crazy and it turn my mind around
Just pass that bottle one more time
And slowly drink it down

Jeanie can I tell you? The shame of my disgrace It's just love or rejection For this borderline case

Back on the borderline one more time

I'm on my bended knees crawling I'm begging you darling
