Toby Mac, Ignition

Start it up Turn it on We can ride this storm A grip of hope in our hands For the coming dawn Up to our necks in complexities Causing us to pause As we collect our thoughts So don't blink if you wanna come cross the border Take a look around or come test the water We won't stop 'till we see the morning So welcome to the quiet before the storm hits Turn on, turn on the ignition Everybody Come on, come on and turn on the ignition Comatose Half-hearted Room temperature's fine Sleep walking, no dream is even filling our minds Earth shaking We be quaking like a wake up bomb This ain't no trouble overseas No Vietnam So don't blink if you wanna come cross the border Take a look around or come test the water We won't stop 'till we see the morning So welcome to the quiet before the storm hits "Take it up a notch, come on, come on turn it up a notch" Turn on, turn on the ignition. Everybody Come on, come on and turn on the ignition [x3] Your sleep walking I'm sleep walking Your sleep walking I'm still talking Come spark the parts in me that all but died Jump start my heart and wake the sleeper inside Hold up the flag 'cause it's ride or die x2
