Tokio Hotel, Live Every Second

From today on the days are only half as long Nothing left to laugh about Yesterday is 1 million years ago The day before already wiped out

Time's been replaced by a countdown The sun is shinin' day and night Sorry, I was just thinkin' twice Wake me up 'cos time is Runnin' out, runnin' out

Live every second, Here and now Don't let go, Live every second Here and now, Don' let go Before it's too late, Before it's too late

From today on life is just a tv-show You can even get a planet for free The whole galaxy is chilling out And time laps are all you can see Don't look back 'cos now is all that counts

Remember that, before you forget Sorry, I was just thinking twice Wake up 'cos time is Runnin' out, Runnin' out

Live every second, here and now Don't let go, Live every second Here and now, don't let go

Wake up, wake up Wake up, Stop it now

Wake up, Wake up Wake up, Wake up!!

Live every second, Here and now Don't let go, Live every second Here and now, Dont let go Before it's too late, Before it's too late

Wake up, Stop it now
