

# TONES AND I, I Am Free

Free

I wasn't born to be an angel  
I cut my feet along the road  
But it reminds me of the days where I was happy  
Playing games with neighbour's kids I hardly know  
And they say I was born to be a suspect  
I carry all the fault  
And it still bothers me the way I went about it  
But I had to leave, you know I had to go

And I knew in time I'd find the end to all the answers  
And I knew in time I'd find I'd carried all the pain  
But I knew in time I'd find a way to just forgive myself  
To forgive myself for leaving you that way

But now I'm free, my darling  
But now I'm free, my darling, my darling  
But now I'm free, my darling  
Now I'm free (I'm free, my darling, I'm free, my darling), my darling, my darling

And I'm ashamed of all the things you've ever said I've done  
Oh I promise you that I'm ashamed about it  
But you never took the blame, no no no, not even once  
While I carry mine alone and drink about it

And I was reaching for your hand  
I would look you in the eye  
I was lying on the floor  
I was fighting for my life  
But you never took the blame  
While I still carry mine, I

But now I'm free, my darling  
Now I'm free, my darling, my darling

And since I went away, yeah I know you think about us  
But you haven't got the hand on heart to show it  
Oh but it wasn't only you, yeah I was angry too  
So I'll take my bow and I'll accept my moment

And I knew in time I'd find the end to all the answers  
And I knew in time I'd find I'd carried all the pain  
But I knew in time I'd find a way to just forgive myself  
To forgive myself for leaving you that way

I'm free, my darling  
I'm free, my darling  
I'm free, my darling  
I'm free  
I'm free, my darling  
I'm free, my darling  
I'm free, my darling  
I'm free  
I'm free, my darling  
I'm free, my darling  
I'm free, my darling  
I'm free  
I'm free, my darling  
I'm free, my darling  
I'm free, my darling  
I'm free  
I'm free, my darling  
I'm free, my darling  
I'm free, my darling  
I'm free

Let me be free
