

Tool, Fear Inoculum

immunity long overdue
contagion I exhale you
lying i opened up to you
venom in mania

now contagious I exhale you

the deceiver says,
he says: you belong to me
you don't wanna breathe the light of the others
for the light
fear the breathe
fear the others for eternity
but I hear them now inhale the clarity
hear the venom
the venom in - what you say - inoculated

Bless this immunity
Bless this immunity
Bless this immunity

exhale, expel
recast my tale
read my allegorical elegy
enumerate
all that I', to do
calculatin
steps away from you
my own mitosis
growing through
delusion from mania

exhale, expel
rest my tale
weave my allegorical elegy

forfeit
all control
you poison
you spectacle

exorcise the spectacle
exorcise the melody
exorcise the disparate
poison for eternity
purge me and evacuate
the venom and the fear that binds me

unveil now
lift away
I see you
running
deceiver chased away
a long time coming
