## Traffic, Hope I Never Find Me There

(Dave Mason)

Seems that I had just to stay the birds have flown, the sky's turned gray The bees have ruffled by the flowers Plastic plants that never die and I Hope they never find me here I walked upon synthetic grass where little people said " Don't ask about the field where you once played Atomic Factories have replaced" and I hope they never find me here The horse I ride has lost a shoe, the buttercups are dry the car I drive has broken down and the blacksmith trade is dying Meals I eat have changed into a concentrated vacuum THe air has come to be as one Time to leave has just begun THe world is waiting its a fact to stage the last and final act and Hope I never find me there There There....
