

Turbonegro, Blow Me

You think I'm fat
But its an optical illusion
You know I'm hot
It's just my chemical solution

So when you hear my mighty call
You better
Hoist your sails and pray for the gods of wind
To blow us all

So blow me
Blow me like the wind
Blow me
Blow me once again

Tonight I'm feeling tops
On the stairs of evolution
I call the shots
In my genetic revolution

Cause I've been waiting
Waiting night and day
Just something good might blow
Might blow my way

So blow me
Blow me like the wind
Blow me
Blow me once again

If I gave you a turn on
Would you raise my antenna
If i gave you a dime
Would you blow my paradigm
If I gave you my candle
Would it be too hot to handle
If I ran for election
Would you support my erection

So blow me
Blow me like the wind
Blow me
Blow me once again
