## Turbonegro, Blow Me

You think I'm fat
But its an optical illusion
You know I'm hot
It's just my chemical solution

So when you hear my mighty call You better Hoist your sails and pray for the gods of wind To blow us all

So blow me Blow me like the wind Blow me Blow me once again

Tonight I'm feeling tops On the stairs of evolution I call the shots In my genetic revolution

Cause I've been waiting Waiting night and day Just something good might blow Might blow my way

So blow me Blow me like the wind Blow me Blow me once again

If I gave you a turn on
Would you raise my antenna
If i gave you a dime
Would you blow my paradigm
If I gave you my candle
Would it be too hot to handle
If I ran for election
Would you support my erection

So blow me Blow me like the wind Blow me Blow me once again
