

Tweak, Wherever You Are

go near
go far
I'm with you wherever you are
When times get hard
Be with you wherever you are

Tonight you and I
We're wishing on the same stars
It's true
That I'm waiting for you
And you're so far away
But if I close my eyes
I hear you breathing next to me
I just have to believe
That if we don't make it tonight
If we don't make it
I will not forget yesterday

Go near
Go far
I'm with you wherever you are
When times get hard
Be with you wherever you are

So we lie
With all the world between us
As we stare into the night
Will she be alright
Or will she fall apart
Shes so scared
Of being on her own
Her fragile heart
Can't weather the dark
So if we don't make it tonight
If we don't make it
I will not forget yesterday

Go near
Go far
I'm with you wherever you are
When times get hard
Be with you wherever you
Go near
Go far
I'm with you wherever you are
When times get hard
Be with you wherever you

Fall asleep
Tear drops on your pillowcase
I hope you're missing me
And I hope you will wait
And as you dream away
Hear me as I promise you
That I'll be back someday
So keep those memories
Because if we don't make it tonight
And if we don't make it
I will not forget yesterday

Go near
Go far
I'm with you wherever you are
When times get hard

Be with you wherever you
Go near
Go far
I'm with you wherever you are
When times get hard
Be with you wherever you
Go near
Go far
Go near
Go far
I'm with you wherever you are.
Wherever you are.
