

# Tyrese, Pullin' Me Back

(Chorus)

Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
Everytime I try to go something keep tellin me that, me that  
Everything gone be alright  
Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
It was meant to be, you were meant for me  
So that means we gotta make it work

Verse 1

It was all good at first, spendin money, goin shoppin', eatin' at the finest  
restaurants and if I'm club hoppin', she was right there with me bottle poppin'  
livin' the life, she just didn't understand my lifestyle and that i aint like  
Buried in the world, gotcha diamonds gotcha pearls, but i can't help it if  
Ching-a-ling be attractin' all the gurls  
(Say what?)Baby, I'm a superstar and that come with it, got a good nigga on your side  
you better run with it  
Even though I'm on the road doin' shows, I made time for me and her  
relationship to grow. They tell me don't trust a woman in this industry,  
but she not any woman, more like a sacred friend to me  
'cause when I'm out of town, always think of her  
Might compensate with some chicks, but no one come above her  
(uh)I thought I was your man, guess you ain't understand  
and now I'm sittin' here lookin' crazy like damn

(Chorus)

Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
Everytime I try to go something keep tellin me that, me that  
Everything gone be alright  
Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
It was meant to be, you were meant for me  
So that means we gotta make it work

Verse 2

Walk in the house, from hard work, my head hurt  
Instead of arguing, can I have dinner with some dessert?  
(Uh-uh)She talkin' bout this phone number she found

It give me time to put my facts down, she straight up clown  
Before we end up fighting, let me leave  
I'm exhausted, and this hurr I don't need  
Now I'm with the fellas ridin' and drinkin', she blowin' my 2-way up but  
I need some time for thinkin' (yeah)I wanna go back but something sayin' naw  
Let me give her some space and the next day I might call  
What should I do? Look, let me ask ya'll. Should I stand tall or let this relationship fall?  
I ain't down with what happened, my feelings crushed. But it happen sometime,  
Either love it or give it up. I thought I was your man, guess you ain't understand  
and now I'm sittin' here lookin' crazy like damn

(Chorus)

Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
Everytime I try to go something keep tellin me that, me that  
Everything gone be alright  
Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
It was meant to be, you were meant for me  
So that means we gotta make it work

Verse 3

So all the fellas know ya feel me, have you ever had a woman  
Good times let the bad times and you ain't see it comin'. Tried ya best  
to make her happy, but it wasn't enough. Mama told me in relationships  
the road get tough. I ain't the one to have my head down, weepin', stressed  
out, 'cause bad as it hurts I gotta move to the next route  
I thought I was a man, yet she ain't understand  
and now she sittin there lookin crazy like damn

(Chorus)

Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
Everytime I try to go something keep tellin me that, me that  
Everything gone be allright  
Everytime I try to leave something keeps pullin me back, me back  
Tellin me I need you in my life  
It was meant to be, you were meant for me  
So that means we gotta make it work
