

Unitopia, I Wish I Could Fly

Standing alone, on the edge of a dream,
I'm falling forward and you are there.
Over the mountain tops,
Over the ocean, spray on your wings,
You fly like an eagle, youre soaring free.

Catching the currents that
Will send you higher on Icarus wings,
Defying gravitys realm.
Dance with the angels,
The force of the wind caresses your body,
Feel the warm touch of the sun light.

Dont get too close or youll
cast a self doubt on what you were told
Escape from realitys hold

All of this time Ive been waiting
To reach for the stars in the sky
You spend all your life recreating
And once more you wish you could fly

From the land that lay dormant the lushness appears
You search for perfection but nothings there
Over the mountain tops
Over the ocean, spray on your wings,
You flew like the eagle so wild and free.

Catching the currents that
Will send you higher on Icarus wings
Defying gravitys realm
