

Uriah Heep, Universal Wheels (Nature's Retaliation)

All the fields are smoke and flame
Fire in the sky
It's a state of emergency
Much more than meets the eye
Just hide away your tears
There are many more hidden fears
As the universal wheels go round n' round
Rivers of pollution
Taking life from living things
Running out of oxygen
There is no way to win
We ignore the signs of nature
Got to learn to live beside her
As the universal wheels go round n' round
Better take good care of all the things you say and do
Look out for the warning sign now it's up to you
There's a mighty eight point six
Waiting in the ground
When she opens up
This world will humble to the sound
There is only one real power
Creating life by the hour
See the universal wheels, see the universal wheels, see the
Universal wheels go round n' round
