

Urma, All On Myself

Simple smile we cannot fake
Little meanings we forget
Come on, don't start falling on me now

Promises we make and brake
Dear friend we cannot save
Come on, don't start falling on me now

It's all on myself
All on myself.

Broken dreams we used to feel
Hidden wound we cannot heal
Come on, don't start falling on me now

Little tricks we have to learn
Trust each other when it hurts
Come on, don't start falling on me now

It's all on myself (all on myself)
It's all on myself
It's all on myself (all on myself)
It's all on myself

So close your eyes
I don't wanna be turned out into stones
Give me a lighter
Let me be gone.

Traces that are left ahead
For the friend we love to death
Come on, don't start falling on me now

Things that choose us 'til we bleed
Meanings that we have to steal
Come on, don't start falling on me now

It's all on myself (all on myself)
It's all on myself
It's all on myself (all on myself)
It's all on myself

So close your eyes
I don't wanna be turned out into stones
Give me a lighter
Let me be gone

So close your eyes
I don't wanna be turned out into stones
Give me a lighter
Let me be gone.

It's all on myself
