Viper, At Least A Chance

Four billion faces
Are searching for their dreams
Fighting for a better way
Despite how hard it seems

Oh! Do you remember Those words from long ago That inspired us to progress To make our future grow

Life goes on It's brutal lessons We must accept Even through the tears

Maybe someday A hopeful light Will lead all the people To live better lives

It will be Like childhood dreams Like cries in the silence But I'll have at least a chance

Street filled with tears Are the picture of my life I've got someone to forget Somethings that I can't hide

The rain is so cold
It cuts me like the past
And the scar deep inside of me
How long will they last?

Life goes on It's brutal lessons We must accept Even through the tears

Maybe someday A hopeful light Will lead all the people To live better lives

It will be
Like childhood dreams
Like cries in the silence
But I'll have at least a chance
