

Viva Voce, The Center Of The Universe

In the center of the universe,
Is a star-sucking hole
And the lives of every planet,
Are in danger as it grows

But it's not the thing that gets me down
No, it's not the thing that brings me down

In the center of the earth,
Where the heat can melt your brain
And all the molten lava,
Comes pouring out like rain

But it's not the thing that gets me down
No, it's not the thing that brings me down

In the center of my heart,
Is a beautiful girl
And one tear from her face,
Could destroy the world

It's the only thing that gets me down
It's the only thing that gets me down
It's the only thing that brings me down
