

Wanda Jackson, Long As I Have You

My world's gonna keep on turning long as I have you
Gonna be a little love like burning long as I have you
Things look a whole lot better I feel good through and through
And I know I'll always stay this way long as I have you
Just as long as you're mine sun's gonna shine
Just as long as you're near no doubts or fears
Then you came my way my cloudy sky's turned blue
And I know I'll always stay that way long as I have you
Won't worry about tomorrow long as I have you
There ain't gonna be no sorrow long as I have you
Things look a whole lot better I feel good through and through
And I know I'll always stay this way long as I have you
Just as long as you're mine...
And I know I'll always stay that way long as I have you
