

Wanda Jackson, Look Out Heart

Well I just had a conversation with my heart
And it said let's stop to sing before it starts
For he gets one put inside close that door and run and hide
Thanks ole heart here is my advice to you
Look out heart here he comes once again look out heart you know you can't win
Well he said he would be true didn't say true to who
Look out heart here he comes again
(guitar)
Well I've been through this a hundred times before
I don't think I can stand this anymore
Step aside let him by cause he's not my kind of guy
Look out heart here he comes again
Look out heart here he comes once again...
Look out heart here he comes again
