Watashi Wa, Face

i drove around this town it looks the same as 1998 when everyday we drove around this town trying to find our way

how did the lights start setting on my dear new york, new york i'll make this loud so maybe you can hear

you know i love love love what you've got i know know know that i'm not the greatest brother that girl could have promise me you'll drive around with me soon

i drove around this town like 90 but not much is the same well i still pray a lot for you i do it every day

how did the lights start setting on my dear new york, new york i'll make this loud so maybe you can hear

you know i love love love what you've got i know know know that i'm not the greatest brother that a girl could have promise me you'll drive around with me soon

you know i love love love what you've got i know know know that i'm not the greatest brother that a girl could have promise me you'll drive around with me soon

with me soon
