

# We Are Scientists, The Method

I watched you watching me  
From laboratory 5  
The breathing mask and safety goggles  
Accentuate your eyes

Suddenly I feel  
That which the method would never allow  
I try to abide by the methodology  
When all I want is to follow my heart  
But when you're a part of the scientific scene,  
The greatest monster of all is love

Chemistry cannot explain  
This burning I feel inside  
You've catalyzed a titration  
That's nebulized my mind

Suddenly I feel  
That which the method would never allow  
I try to abide by the methodology  
When all I want is to follow my heart  
But when you're a part of the scientific scene,  
The greatest monster of all is love

Suddenly I feel  
That which the method would never allow  
I try to abide by the methodology  
When all I want is to follow my heart  
But when you're a part of the scientific scene  
The greatest monster is you my love

Love is something I  
Simply can't pin down  
Love is something I  
Simply can't pin down  
Love is something I  
Simply can't pin down  
Love is something I  
Simply can't pin down
