

# Ween, Friends

I dreamt of a move  
a great move  
to another place with much more land  
I was driven by car  
and woke before I got there  
I remember the place and it was beautiful

A friends a friend who knows what being a friend is, talking with a friend.  
As friends we were always so close but so far away...  
friends in life are special do you want me as your special friend?  
Cause you're the friend that I've been searching for.

There was more for me  
It would be more open  
scary to think that I could be happy  
she'd said it was the same road

but up more, alot more  
just be patient and we'll get there

A friends a friend who knows what being a friend is, talking with a friend.  
As friends we were always so close but so far away...  
friends in life are special do you want me as your special friend?  
Cause you're the friend that I've been searching for.

I never got there  
but the morning brings light  
and so, I'll keep on looking.

A friends a friend who knows what being a friend is, talking with a friend.  
As friends we were always so close but so far away...  
friends in life are special do you want me as your special friend?  
Cause you're the friend that I've been searching for.
