

# Westworld, Black Shadow Symphony

Shot down in cold blood fever  
Spread the news as fast as you can  
Get it out to all the fine people  
They wanna know  
But they don't wanna understand

Some kid, a little bit hyper  
Takes his medicine like a good boy  
Hard snap in his head one monday  
Spraying bullets with his new shiny metal toy

Black Shadow Symphony  
Come whisper loudly in my ear  
With every little sound bite  
I'm more addicted to your fear

Front page on every paper  
Television special report  
Soak it up like a sponge on steroids  
If it's bad, we only want to hear it more

Hey you, the one in denial  
You can dream but you're never gonna sleep  
Take a hard look in the mirror  
Everyone of us is part of a disease yeah

Black shadow symphony  
Come whisper loudly in my ear  
With every little sound bite  
I'm more addicted to your fear

Everybody says put the kid in a jail for life  
Or better yet let the sucker fry  
He's an evil child  
Load 'em up and ship 'em off to another galaxy  
(there's) nothing wrong with our society  
The home of the well adjusted man
