

# Witchery, All Evil

Hell - storms hard  
Rampant evil cloud the skies  
Creatures - sing  
As they praise the unborn child  
Famine and plague  
Race thru out the world  
On wings of damnation  
There's a fire in the sky  
Behold the riders in the night  
With fear we whisper their names  
War and death - famine and plague  
Prophecies  
Forfilled with cold precision  
Seas of blood - predict mankinds extinction  
War and death  
Unleash the terror  
With divine intervention  
There's a fire in the sky  
Behold the riders in the night  
With fear we whisper their names  
War and death - famine and plague  
There's a fire in the sky  
Behold the riders in the night  
With fear we whisper their names  
War and death - famine and plague
