Wiz Khalifa, Right Here

(I got it right here for you girl)

I heard that love was blind
But girl I've seen it (girl I've seen it)
And I need it (yes I need it)
I want to make you mine
And girl you know it, 'cause I showed it
Please don't blow it
What you need is right here (ah oh)
What you need is right here (ah)
Everything you need is right here (ah)
Everything you need is right here (here, here, here)

And no I'm not there It's true them other dudes don't compare See I got girls a few I don't care When I see you, I stop and I stare I'm not some player Or just some guy You like my swagger Think that I'm fly You caught my eye Across this club I'm way pass drunk I think I'm in love And you my drug I need you most I take you until I overdose Come here get close And hit this smoke If you want 'scape Then we can get ghost If you want go Back to my crib Get interested Won' see how I live Some peace and quiet To get to know Wiz Before we slide You need to know this

I heard that love, was blind
But girl I've seen it (girl I've seen it)
And I need it (yes I need it)
I want to make, you mine
And girl you know it, 'cause I showed it
Please don't blow it
What you need is right here (ah oh)
What you need is right here (ah)
Everything you need is right here (ah)
Everything you need is right here (here, here, here)

And no where else
It ain't my fault can't help myself
I catch my breath
When I see you
You just my style
So what you wan' do
You private it can just be us two
If you got friends
Then bring your crew
You know how to keep a secret
Me too

I won't tell no one else what we do
Putting your nails all in my tattoo
I want you bad as hell and that's true
You tell me what a player gotta do
To make you understand a mad dude
I won't act new
When I'm around
If you end up lettin' me bust you down
I ain't no clown
That you know this
Before we slide you need to know this

I heard that love, was blind
But girl I've seen it (girl I've seen it)
And I need it (yes I need it)
I want to make, you mine
And girl you know it, 'cause I showed it
Please don't blow it
What you need is right here (ah oh)
What you need is right here (ah)
Everything you need is right here (ah)
Everything you need is right here (here, here, here)

So don't go far
I won' be everywhere that you are
Your biggest fan
So be my star
I hope you find your way to my car
I take my time, do this right
I'm down for anything that you like
Make girls play the left
'Cause you're right
Just one thing to tell you tonight

I heard that love, was blind
But girl I've seen it (girl I've seen it)
And I need it (yes I need it)
I want to make, you mine
And girl you know it, 'cause I showed it
Please don't blow it
What you need is right here (ah oh)
What you need is right here (ah)
Everything you need is right here (ah)
Everything you need is right here (here, here, here)
