

# Wolf, Seize The Night

The wolves are on the hunt tonight  
Can you hear them howling from a distance?  
Listen to the footfall of the predator  
Sneaking 'round your door

Shimmering images shatter the still of the mind  
Moonlight so bright, shadows come alive

Night, seize the night  
Let's steal what we can and leave behind a wasteland  
Night, seize the night

The scent of prey is in the air  
Innocence sleeps unaware in for the kill  
Aroused like a wild cat before the attack  
Neurons fire at will

Shimmering images shatter the still of the mind  
Moonlight so bright, shadows come alive

Night, seize the night  
Let's steal what we can and leave behind a wasteland  
Night, seize the night  
The carnage awaits and we're ready to kill

Never before have you felt this much alive  
I've opened the door to another side  
Take one step with me and you'll see the darkness turns bright  
Cursed be the days, here comes the endless night

Night, seize the night  
Let's steal what we can and leave behind a wasteland  
Night, seize the night  
The carnage awaits and we're ready to kill

Listen to the call of the wild  
Receive the blessing of the beast

Night, seize the night
