

YUNGBLUD, Loner

all my friends will desert again
and I don't want to be a loner
in my head I can sleep when I am dead
baby, don't let te hype delude ya

I got no one from te quiet life
no forced smiles over tired eyes
give me a taste of the riot life
cause I'd rather be a gangster then grow tomatoes
keep the young between your teeth
you take the love
take the goods
take the self-belief
you make you shoes look squeaky clean
but if you want to be a leader stop being a cheater

so bounce if you've had enough
of the people you know
so bounce if you've had enough
of the alter-ego
so bounce if you've had enough
of the people you know
so bounce if you've had enough
and just let go

all my friends will desert again
and I don't want to be a loner
in my head I can sleep when I am dead
baby, don't let te hype delude ya

now lock me up in a riot van
with a hole from a pistol in this old man
cause a time bomb
sleep with the lights on
... like a playground
sugar coat distractions to cover up their shade now
how now
you better let me out

all my friends will desert again
and I don't want to be a loner
in my head I can sleep when I am dead
baby, don't let te hype delude ya

you know what I mean
you know what I mean
you know what I mean
do you know what I mean
?
you know what I mean
you know what I mean
you know what I mean
do you know what I mean?

so bounce if you've had enough
of the people you know
so bounce if you've had enough
of the alter-ego
so bounce if you've had enough
of the people you know
so bounce if you've had enough
and just let go

all my friends will desert again

and I don't want to be a loner
in my head I can sleep when I am dead
baby, don't let te hype delude ya

all my friends will desert again
and I don't want to be a loner
in my head I can sleep when I am dead
baby, don't let te hype delude ya
